

MELAGIRIS (TAMIL NADU)

PROPOSAL FOR IMPORTANT BIRD AREA (IBA)

State	: Tamil Nadu, India
District	: Krishnagiri, Dharmapuri
Coordinates	: 12°18'54"N 77°41'42"E
Ownership	: State
Area	: 98926.175 ha
Altitude	: 300-1395 m
Rainfall	: 620-1000 mm
Temperature	: 10°C - 35°C
Biographic Zone	: Deccan Peninsula
Habitats	: Tropical Dry Deciduous, Riverine Vegetation, Tropical Dry Evergreen

Proposed Criteria

A1 (Globally Threatened Species)

A2 (Endemic Bird Area 123 - Western Ghats, Secondary Area s072 - Southern Deccan Plateau)

A3 (Biome-10 - Indian Peninsula Tropical Moist Forest, Biome-11 - Indo-Malayan Tropical Dry Zone)

GENERAL DESCRIPTION

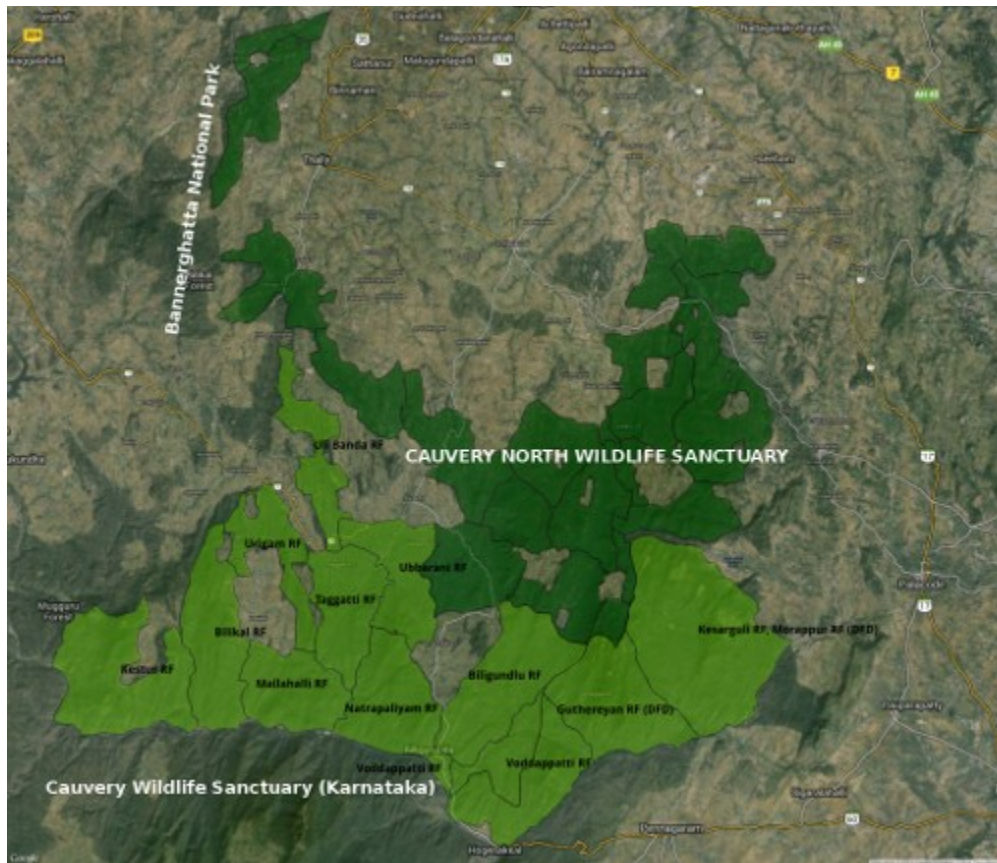

The Melagiris are a group of hills lying nestled between the Cauvery and Chinnar rivers, to the south-east of Hosur taluk in Tamil Nadu, India. The Melagiris form part of an almost unbroken stretch of forests connecting Bannerghatta National Park (which forms its north-western boundary) to the forests of Cauvery Wildlife Sanctuary - Karnataka (which forms its southern boundary, separated by the river Cauvery), and further to Biligirirangan hills and Sathyamangalam forests. The northern and western parts are comparatively plain and is part of the Mysore plateau.

The average elevation in this region is 500-1000 m. Ground sinks to 300m in the valley of the Cauvery and the highest point is the peak of Guthereyan at 1395.11 m.

Red sandy loam is the most common soil type found in this region. Small deposits of alluvium are found along Cauvery and Chinnar rivers and Kaoline is found in some areas near Jowlagiri.

The temperature ranges from 10°C – 35°C. South-west monsoon is fairly active mostly in the northern areas, but north-east monsoon is distinctly more effective in the region. Average rainfall is about 760 mm, but some pockets in Denkanikottai range receive upto 1000 mm rainfall.

The following map shows the proposed area for the IBA. The area shaded in dark green are part of the Cauvery North Wildlife Sanctuary, Tamil Nadu. The area shaded in light green are the reserve forests of Hosur and Dharmapuri Forest Divisions in between the Cauvery North WLS, the river Cauvery and the river Chinnar.

Name	Area (hectare)
North Cauvery Wildlife Sanctuary	50433.00
Ulibanda RF, Hosur FD	3241.53
Tagatti RF, Hosur FD	4341.47
Ubraini RF, Hosur FD	4831.95
Urigam RF, Hosur FD	3231.01
Kesthur RF, Hosur FD	5852.97
Billikal RF, Hosur FD	5433.31
Mallahalli RF, Hosur FD	4032.29
Natrapalayam RF, Hosur FD	4986.98
Biligundlu RF, Hosur FD	6092.14
Wodappati RF, Hosur FD	2557.62
Wodpatti RF, Dharmapuri FD	4609.17
Guthereyan RF, Dharmapuri FD	6666.86
Kesarguli RF, Dharmapuri FD	approx 4500.00
Morappur RF, Dharmapuri FD	approx 4500.00
Total	115310.30

RF: Reserve Forest FD: Forest Division

Most parts of the forests are classified under Southern Tropical Dry Mixed Deciduous Forests (5A/C3). Southern Tropical Riverine Forests (5/B1) form a narrow strip along Cauvery and Chinnar rivers. Southern Tropical Dry Evergreen Forests (7/C1) are found in some sheltered pockets in Denkanikottai range where rainfall is around 1000 mm and elevation 800-1315 m. Southern Tropical Dry Deciduous Scrub Forests (5A/DS1) are seen mostly near forest borders. *Hardwickia binata*, *Terminalia arjuna*, *Tamarindus indica*, *Garcelona gummigatta*, *Shorea roxburgii*, *Santalum album* and *Bamboo sp* are some of the the important flora found in the area.

AVIFAUNA

The birds seen in Melagiris are mostly typical of the tropical dry deciduous/dry scrub forests found here. Variations from this pattern are seen along the Cauvery and Chinnar rivers, and in the evergreen patches of Denkanikottai range. A total of 268 species have been recorded from the area. A comprehensive bird survey was conducted in February 2014 which helped to collect a lot of first hand data about the birds in Melagiris.

A1: Globally Threatened Species

A pair of Egyptian Vultures *Neophron percnopterus* were seen nesting in Devarbetta in Jowlagiri range and photographed. Indian Spotted Eagle, a Vulnerable species, is seen wide-spread in Hosur Forest Division, and have been recorded from Denkanikottai, Hosur, Rayakottai and Urigam areas. Pied Tit, another Vulnerable Species has been recorded from Denkanikottai in Hosur Division and parts of Dharmapuri Division. The birds seen here are a part of the small surviving South Indian population in the South portions of the Eastern Ghats. A flock of Nilgiri Wood Pigeon was recorded from Kodekarai during Melagiri Bird Survey, 2014.

The IUCN red-listed species found in the area are listed below.

No	Species	Scientific Name	Redlist
1	Egyptian Vulture	<i>Neophron percnopterus</i>	EN
2	Woolly-necked Stork	<i>Ciconia episcopus</i>	VU
3	Indian Spotted Eagle	<i>Aquila hastata</i>	VU
4	Nilgiri Wood Pigeon	<i>Columba elphinstonii</i>	VU
5	White-naped Tit	<i>Parus nuchalis</i>	VU
6	Painted Stork	<i>Mycteria leucocephala</i>	NT
7	Black-headed Ibis	<i>Threskiornis melanocephalus</i>	NT
8	Spot-billed Pelican	<i>Pelecanus philippensis</i>	NT
9	Oriental Darter	<i>Anhinga melanogaster</i>	NT
10	Lesser Fish Eagle	<i>Ichthyophaga humilis</i>	NT
11	Pallid Harrier	<i>Circus macrourus</i>	NT
12	River Tern	<i>Sterna aurantia</i>	NT

Egyptian Vulture at Devarbetta, Jowlagiri Range

Lesser Fish Eagle Raasimanal, Anchetty Range

Painted Storks at Thally, Jowlagiri Range

Darters at Dabaguli, Urigam Range

Greater Grey-headed Fish-Eagle *Ichthyophaga ichthyaetus* (Near Threatened) has also been reported from the area until 3 years ago. These sightings could have been of Lesser Fish Eagle and need to be verified. All Fish Eagles recorded during Melagiri Bird Survey 2014 were also Lesser, which makes this even more probable. Also, Yellow-throated Bulbul *Pycnonotus xantholaemus* (Vulnerable), Oriental White-backed Vulture *Gyps bengalensis* (Critically Endangered) and Long-billed Vulture *Gyps indicus* (Critically Endangered) have been documented from both the nearby IBAs of Bannerghatta National Park and Cauvery Wildlife Sanctuary, Karnataka. Since Melagiri forms a contiguous patch of forests between these two IBAs, it is probable that these birds are present in Melagiris also, but have not been documented yet.

A2: Restricted Range Species

Melagiris has restricted range species from Endemic Bird Area 123 (Western Ghats). Good population of Blue-winged Parakeet is present in the forests of Denkanikottai range.

Endemic Bird Area 123 (Western Ghats)		
1	Nilgiri Wood Pigeon	<i>Columba elphinstonii</i>
2	Blue-winged Parakeet	<i>Psittacula columboides</i>
3	Greater Flameback	<i>Chrysocolaptes guttacristatus</i>
4	Nilgiri Flowerpecker	<i>Dicaeum concolor</i>
5	Crimson-backed Sunbird	<i>Leptocoma minima</i>

Blue-winged Parakeet at Aiyur, Denkanikottai Range

A3: Biome Restricted Assemblage

Out of the 15 species that represent **Biome-10 (Indian Peninsula Tropical Moist Forest)**, 7 have been documented from Melagiris.

Biome-10 (Indian Peninsula Tropical Moist Forest)		
1	Blue-faced Malkoha	<i>Phaenicophaeus viridirostris</i>
2	Jerdon's Nightjar	<i>Caprimulgus atripennis</i>
3	White-cheeked Barbet	<i>Megalaima viridis</i>
4	Yellow-browed Bulbul	<i>Acritillas indica</i>
5	Indian Scimitar Babbler	<i>Pomatorhinus horsfieldii</i>
6	Malabar Whistling Thrush	<i>Myophonus horsfieldii</i>
7	Loten's Sunbird	<i>Cinnyris lotenius</i>

Small Green-billed Malkoha at Urigam Range

35 out of the 59 species that represent **Biome-11 (Indo-Malayan Tropical Dry Zone)** have been documented.

Brown-headed Barbet, Anebiddahalla, Anchetty Range

Yellow-wattled Lapwing, Aiyur, Denkanikottai Range

Biome-11 (Indo-Malayan Tropical Dry Zone)		
1	Jungle Bush Quail	<i>Perdica asiatica</i>
2	Painted Bush Quail	<i>Perdica erythrorhyncha</i>
3	Indian Peafowl	<i>Pavo cristatus</i>
4	Red-naped Ibis	<i>Pseudibis papillosa</i>
5	White-eyed Buzzard	<i>Butastur teesa</i>
6	Yellow-wattled Lapwing	<i>Vanellus malabaricus</i>
7	Yellow-footed Green Pigeon	<i>Treron phoenicopterus</i>
8	Plum-headed Parakeet	<i>Psittacula cyanocephala</i>
9	Sirkeer Malkoha	<i>Taccocua leschenaultii</i>
10	Mottled Wood Owl	<i>Strix ocellata</i>
11	Indian Nightjar	<i>Caprimulgus asiaticus</i>
12	Indian Grey Hornbill	<i>Ocyrceros birostris</i>
13	Brown-headed Barbet	<i>Megalaima zeylanica</i>
14	Yellow-crowned Woodpecker	<i>Dendrocopos mahrattensis</i>
15	Black-rumped Flameback	<i>Dinopium benghalense</i>
16	White-naped Woodpecker	<i>Chrysocolaptes festivus</i>
17	Common Woodshrike	<i>Tephrodornis pondicerianus</i>
18	Ashy Woodswallow	<i>Artamus fuscus</i>
19	Marshall's Iora	<i>Aegithina nigrolutea</i>
20	Black-headed Cuckooshrike	<i>Coracina melanoptera</i>
21	Small Minivet	<i>Pericrocotus cinnamomeus</i>
22	White-bellied Drongo	<i>Dicrurus caerulescens</i>
23	White-browed Fantail	<i>Rhipidura aureola</i>
24	White-naped Tit	<i>Parus nuchalis</i>
25	Ashy-crowned Sparrow-Lark	<i>Eremopterix griseus</i>
26	White-browed Bulbul	<i>Pycnonotus luteolus</i>
27	Jungle Prinia	<i>Prinia sylvatica</i>
28	Ashy Prinia	<i>Prinia socialis</i>
29	Tawny-bellied Babbler	<i>Dumetia hyperythra</i>
30	Large Grey Babbler	<i>Turdoides malcolmi</i>
31	Jungle Babbler	<i>Turdoides striata</i>
32	Yellow-billed Babbler	<i>Turdoides affinis</i>
33	Chestnut-tailed Starling	<i>Sturnia malabarica</i>
34	Brahminy Starling	<i>Sturnia pagodarum</i>
35	Indian Robin	<i>Saxicoloides fulicatus</i>

Sirkeer Malkoka, Uganiyam, Urigam Range

Indian Grey Hornbill, Urigam Range

OTHER KEY FAUNA

The riverine forests along Cauvery provides habitat for Grizzled Giant Squirrel, a species threatened by rapid habitat loss. The region is estimated to have 150-200 elephants, but this number varies throughout the year.

Other mammals found in the area are the Sloth Bear, Dhole, Leopard, Four Horned Antelope, Sambar, Chital, Small Indian Civet, Common Mongoose, Madras Tree Shrew, Jungle Cat, Golden Jackal, Gerbil, Black Naped Hare, Bonnet Macaque, Wild Pig. Indian Gaur, Common Palm Civet, Mouse Deer, Barking Deer, Ruddy Mongoose, Stripe Necked Mongoose, Slender Loris and Rusty spotted cat. Around 32 species of reptiles include Marsh Crocodile, Indian Rock Python, Indian Cobra, Russell's Viper, Common Sand Boa, etc, 10 species of amphibians, 18 species of fishes, and over 250 species of flora have been documented.

THREATS AND CONSERVATION ISSUES

- Lack of Protected Status to the Forest
- Human – Elephant Conflict
- Grazing
- Poaching
- Agricultural Expansion
- Invasive Species
- Absence of Scientific Study and Census of Wildlife

Large parts of the forests of Melagiris are Reserve Forests, and do not enjoy the protection status of a Wildlife Sanctuary or National Park, even though they are prime wildlife habitat and borders Cauvery North Wildlife Sanctuary - Tamil Nadu and Cauvery Wildlife Sanctuary - Karnataka. The forests are largely unexplored and scientific study of its biodiversity and systematic wildlife census are not done. Anthropogenic pressures in the form of illegal firewood smuggling, poaching, cattle penning, goat-grazing, jatres-festivals inside reserve forests, forest fires etc goes unchecked, in spite of the best efforts of the forest department.
